Career Goal

I am an electrical engineer but I love data analyst and I love to learn new things. I am self-taught data analyst. I believe my expertise and skill can be a good leverage to support your data/business unit.

Portfolio

- SQL [SQLite, MSSQL]
- Dashboard [Power BI, Looker studio, Excel, Grafana]
- Data analysis [Python, R, Google Sheet]
- Web scraping pakorn-electric.com and create a new cable electrical database.
- Train-Test model ML [Python, R, Google Sheet]

Education

Bachelor of Electrical Engineer, Ubon Ratchathani University (2014 - 2018)

Thesis Project: Image processing with python. Build a low-cost hyperspectrum.

Experience

Electrical Engineer - Thai Malaya Glass (2018 - present)

- Manage data energy for manager/analysis team.
- Analyze and build dashboard energy by location and find specific energy consumption.
- Create Insert Update Delete database IoT on the system [PHP MySQL, MSSQL]
- Build dashboard IoT on grafana.
- Train-Test model simple ML predicts vibration damage zone.
